PROFESSIONAL SUMMARY

Full Stack Developer (MERN Stack) with hands-on experience building responsive web applications using React.js, Node.js, Express.js, and MongoDB. Collaborated within a cross-functional team during a 6-week internship, and independently designed, built, and deployed 3 full-stack projects end-to-end. Skilled in RESTful API design, frontend architecture, and database management, with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, and System Design. Solved 450+ problems on LeetCode and placed in multiple competitive coding events. Seeking a Software Developer / Full Stack Developer role to apply strong problem-solving, ownership, and full-stack development skills.

EDUCATION

Chandigarh University

Bachelor of Engineering (B.E.), Computer Science | CGPA: 7.61 / 10

2023 – Present

Mohali, Punjab, India

Seven Hills School

Higher Secondary (Class XII), CBSE | Percentage: 82.8%

2022 – 2023

Etawah, Uttar Pradesh, India

Seven Hills School

Secondary (Class X), CBSE | Percentage: 85.33%

2021 – 2022

Etawah, Uttar Pradesh, India

PROJECTS

Digital Expense Tracker | MERN, JavaScript, MongoDB | Live | GitHub

Feb 2026 – Jun 2026

- Designed and developed a full-stack MERN expense-tracking application end-to-end, from database schema to deployed UI.
- Automated email reminders across 3 recurring-bill categories (rent, electricity, mobile), cutting manual bill tracking to zero.
- Created interactive charts and monthly summary dashboards covering income, category-wise spend, and spending trends over time.

Exam Pro | MERN, JavaScript, MongoDB | Live | GitHub

Oct 2025 – Jan 2026

- Engineered a full-stack online examination platform supporting 2 distinct user roles (teacher, student) with role-based access control.
- Enabled teachers to create and manage unlimited quizzes while students joined instantly via a unique quiz code, cutting login friction entirely.
- Built timer-based exams with automatic scoring and a real-time leaderboard, replacing manual grading for every quiz submitted.

Ground Booking Management System | MERN, JavaScript, MongoDB | Live | GitHub

Mar 2025 – Aug 2025

- Architected an interactive dashboard for managing sports-ground bookings, availability, and user profiles from the ground up.
- Developed RESTful APIs with Node.js and Express.js across booking, ground, and user modules to connect frontend and backend seamlessly.
- Added real-time availability checks to prevent double bookings, along with search, filter, and sort options by location, sport type, and availability.

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript

Frontend: React.js, Tailwind CSS, HTML5, CSS5

Backend: Node.js, Express.js, RESTful APIs

Databases: SQL, NoSQL

Core CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks, System Design

Tools & Platforms: Git, GitHub, VS Code, Postman

ACHIEVEMENTS

- Solved 450+ Data Structures and Algorithms problems on LeetCode.
- Secured 3rd Position in Webathon, a website development competition.
- Secured 4th Position in AlgoArena, a Data Structures and Algorithms competition.
